5 INSTALLATION

- Clean an area on the windshield where you wish the Dash Cam to be installed, this assists in adhesion.
- Remove the protective film from the back of the bracket, attach the adhesive side of the mount on the windshield where it has an unobstructed view of the road but does not interfere with the driver's view. As shown below.

6 APP INSTRUCTION

Install DDPai APP

Scan the QR code to download the "DDPai" APP.

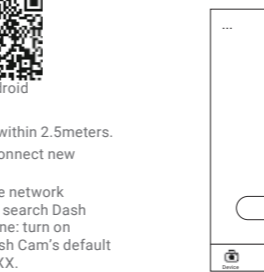

Pair Smart Phone to Dash Cam

- Keep the Dash Cam and mobile phone within 2.5 meters.
- Launch DDPai App, tap on "Device > Connect new devices".
- Choose your DDPai Dash Cam from the network list (For Android system, App will start to search Dash Cam network automatically. For iOS phone: turn on WLAN from "Settings -> WLAN"). The Dash Cam's default SSID (or Wi-Fi name) is DDPai_mini_XXXX.
- Enter the password (the default password is '1234567890').
- Enter DDPai App, wait a few seconds until the preview screen show.

Preview

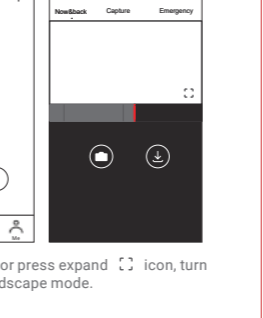

- Open the DDPai App, and add your Dash Cam.
- Select "Device > Entering" tab, this will bring you to the preview page.

Rotate your smart phone or press expand icon, turn the preview screen to landscape mode.

Playback

- Tap and left/right drag timeline bar at the screen bottom to create the starting point of the recording you wish to preview, then tap on thumbnail when you have made your selection, or wait for 5 sec for buffering, now you can watch the history recording.
- Tap on from preview screen to enter the download interface.
- After the video has finished downloading, click "Complete".

Download Video Files

- Tap and left/right drag timeline bar at the screen bottom to create the starting point of the recording you wish to download, then tap on thumbnail when you have made your selection, or wait for 5 sec for buffering, to enter the download start screen.
- Tap on from preview screen to enter the download interface.
- After the video has finished downloading, click "Complete".
