

BASIC FUNCTIONS (Non-Charged)

1. Audio Transcription (includes 16+ Languages#)

- **Pre-recorded Audio Transcription:**

Effortlessly break language barriers. The system accepts recorded audio file in one language (e.g., **Spanish**) and translates in texts of another language (e.g., **English**).

- **Intelligent Text Re-Organization:**

The above original transcribed text may be messy and difficult to browse. After the audio is converted to text, AI will optimize the output into a specific format according to your needs:

- **Meeting Minutes:** such as discussion minutes, information summary, progress report, task assignment, class notes, teaching work minutes, Q&A minutes, automatically identify key decisions, action items, and participants.
- **Mind Maps:** such as logical structure diagrams, mind maps, organizational structure diagrams, directory structure diagrams, timelines, fishbone diagrams, etc. They transform lengthy discussions into concise summaries, visualizing the logical flow of conversations for better discussion.
- **Transcription:** Translate the original text into different languages, and then export audio, MSWORD, JPEG, etc.

基本功能（免扣點）

1. 音訊轉錄（支援 16+ 種語言#）

- **預錄音頻翻譯：**

輕鬆打破語言障礙。系統可以將預錄一種語言（例如西班牙語）的音頻，並翻譯成另一種語言（例如英語）的文字。

- **智慧文字重組：**

以上原始轉錄文本可能雜亂無章，難以瀏覽。音訊轉換為文字後，AI 會根據您的需求，將輸出最佳化為特定格式：

- **會議紀錄摘要：**如 討論紀要, 資訊總結, 進展匯報, 任務分配, 課堂筆記, 教學工作紀要, 問答紀要, 自動辨識關鍵決策、行動事項和與會者。
- **思維導圖：**如 邏輯結構圖, 思維導圖, 組織結構圖, 目錄結構圖, 時間軸, 魚骨圖, 等。將冗長的討論, 變成簡潔明了的概要。視覺化對話的邏輯流程, 以便更好地進行討論。
- **轉寫翻譯：**將原文翻譯成不同的語言, 可再 導出音頻, 導出 MSWORD, JPEG, etc.
